

Be ready this wet season

Two to three cyclones may form in our region this wet season.

The Top End is affected by severe storms, cyclones and storm surge. **Two to three cyclones may form in our region this wet season.**

Wind speeds can exceed **240km per hour**

This can turn household items into destructive objects. After the eye of the cyclone passes, the wind blows with equal strength **but in the opposite direction.**

Maintain roof and gutters

Trim trees and branches

If your house is built to code and well maintained, stay at home. If not, ask friends or seek an emergency cyclone shelter when advised.

Make sure objects like rubbish bins, kids toys and garden furniture are **stowed away or securely tied down.**

The NT Emergency Service issues 3 warning levels:

Advice: stay up to date

Watch and Act: start taking action

Emergency Warning: act immediately

Your cyclone kit needs to sustain you and your family for 72 hours or more. Remember, you need at least **10 litres of bottled water per person, per day.**
